Skills

- **Languages**: C++, JavaScript, Python (Pandas, NumPy, Scikit-learn), C, Java
- **Frontend**: HTML, CSS, Bootstrap, React.js
- **Backend**: Node.js, Express.js
- **Databases & Tools**: MySQL, MongoDB, Power BI, AWS, Docker
- **Soft Skills**: Problem Solving, Team Player, Adaptability, Creative Thinking

Projects

- **AI Health Risk Predictor:** Health Analysis Platform — November 2025 - December 2025
  - Developed an AI-powered healthcare platform to predict disease risks (diabetes, heart disease, obesity) using ML models based on user health and lifestyle inputs.
  - Built a responsive interface for users to input health parameters and receive instant risk scores and lifestyle recommendations.
  - Implemented authentication and a health dashboard to track prediction history while optimizing APIs, improving response speed and boosting user engagement by 10%.
  - **Tech:** Python, Scikit-learn, React.js, Node.js, MongoDB
- **Global Mobile Review Dashboard:** Reviewing Mobile Phones — September 2025 – October 2025
  - Developed an interactive dashboard to analyze and visualize mobile reviews, ratings, and sentiment for market insights.
  - Created dynamic visual reports to compare brands, pricing trends, and customer feedback patterns.
  - **Tech**: Power BI, Python
- **URL Shortener**: URL Management Service — May 2024 – June 2024
  - Built a fast URL shortening service allowing users to generate short links with instant redirection.
  - Developed a responsive full-stack platform using React and Tailwind.
  - Implemented a custom URL feature that improved user experience and increased engagement by 35%.
  - **Tech:** React.js, Node.js, Express.js, MongoDB

Training

- **Data Science with Machine Learning** — July 2025 - August 2025
  - Completed a ML model that predicts the risk of heart disease using patient health parameters.
  - Performed data cleaning, preprocessing, feature selection, exploratory data analysis (EDA), and trained supervised ML models using Scikit-learn to compare performance.
  - Achieved reliable prediction accuracy, enabling early-risk identification and demonstrating a complete end-to-end ML workflow.

Certificates and Certifications

- Data Science With Machine Learning: CipherSchools **Certificate** — May 2025
- Cloud Computing: NPTEL **Certificate** — January 2025
- Data Structures and Algorithms (C++): Apna College **Certificate** — May 2024

Achievements

- Solved 350+ problems on LeetCode, significantly improving problem-solving speed and accuracy across core DSA topics.
- Achieved a global rating of 1101 on CodeChef and ranked among 4,000+ participants in START215.
- Selected for the Smart India Hackathon 2024 finals, shortlisted among 3,000 teams.

Education

- **Lovely Professional University** — Phagwara, Punjab
  Bachelor of Technology: Computer Science and Engineering; ***CGPA: 8.10*** — *August 2023 - Present*
- **Holy Cross School** — Bokaro, Jharkhand
  Intermediate: ***Percentage: 81.8%*** — *April 2022 - May 2023*
- **J.L.N. Memo Senior Secondary School** — Dhanbad, Jharkhand
  Matriculation: ***Percentage: 80.4%*** — *March 2020 - April 2021*
